EXPERIENCE & LEADERSHIP

Freelance Web Developer 05/2026 – Present
CashBack Motors

- Engineered and deployed a modern e-commerce platform for a motorcycle dealership using Next.js, React, and Tailwind CSS, improving local online presence and user engagement by 70%.
- Established automated CI/CD pipelines via Vercel for continuous deployment, ensuring zero-downtime updates and seamless multi-language (i18n) rendering.
- Integrated custom business logic and REST APIs for dynamic catalog management, tailoring the UI to meet specific client requirements regarding price visibility.

Core Team Member 04/2026 – Present
AWS Community (University Chapter)

- Organized and facilitated technical workshops for 16+ students, focusing on Amazon Web Services (AWS) and scalable cloud architecture.
- Collaborated within an Agile team structure to plan, promote, and execute campus-wide technical initiatives.

Founder & Tutor 2023 – 2024
ECPC Training Discord

- Founded and managed a Discord-based training hub for the Egyptian Competitive Program Club (ECPC), scaling the community to facilitate study communications for [X]+ active members.
- Led a team of 2 tutors to actively mentor 20+ students in C++ and fundamental algorithmic problem-solving.
- Coached 3+ teams to successfully rank in the top 100 in national ECPC competitions.

EDUCATION

Bachelors of Engineering in Computer Engineering 02/2028
Arab Academy for Science and Technology (AAST) Alexandria, Egypt

- Concentration: Web engineering, cloud computing, Database, and AI.
- Related Coursework: Python, C++, C#, HTML/CSS, Data Structures, and Object-Oriented Programming, Microprocessor Architecture, Database Management Systems.

TECHNICAL SKILLS

Programming Languages Python, C++/C, C#, Java, Assembly, JavaScript	Frontend Next.js, React, HTML/CSS, Tailwind CSS
Backend & Databases SQL, PostgreSQL, MongoDB, Microsoft SQL Server, Power BI	Cloud & DevOps Amazon Web Services (AWS), Vercel, Git/GitHub
Hardware & Systems ROS 2, Raspberry Pi, Arduino, Microprocessors (8086), Sensor Integration	Platforms & Core Competencies Linux, MacOS, Windows, Data Structures, OOP, Discrete mathematics, Fundamental problem solving

SELECTED PROJECTS

- EVE (Teleoperated Robot)**
Team Lead
- Engineered a teleoperated robotic system integrating a Raspberry Pi 4 and ROS 2 with ultrasonic sensors, processing real-time spatial awareness data.

- Designed custom ROS 2 message definitions to facilitate low-latency communication with a PlayStation controller.

Bus Management System

JavaFX, SQL

- Designed relational database architecture and ERD mapping for a transit system, managing over 7+ simulated routes and schedules using SQL.
- Built a responsive JavaFX graphical user interface for real-time monitoring and administrative control.

Modified SIC/XE Assembler

Python

Programmed a two-pass assembler in Python for the SIC/XE architecture, processing symbol table generation and object code translation with high accuracy.

Bean Plant Classification Model

Python, LightGBM

Trained and evaluated a LightGBM machine learning classifier using a Kaggle dataset via Google Colab, achieving 93.15% accuracy in categorizing structural plant variations.
