SUMMARY

4th-year Computer Engineering student at AAST (Alexandria). I build things, from bilingual full-stack web apps for local businesses to a teleoperated robot and an assembler. I am now going deeper into cloud and DevOps on AWS, with a focus on deployment and infrastructure.

EXPERIENCE & LEADERSHIP

Freelance Web Developer 05/2026 – Present
Alexandria, Egypt
- Built a bilingual (English and Arabic, right-to-left) showcase website for Cash Back Moto, a motorcycle and scooter shop in Alexandria, using Next.js, TypeScript, Tailwind CSS and next-intl, deployed on Vercel.
- Built DEKKA, an Arabic-first event reservation app for a coffee shop, using Next.js, TypeScript, MongoDB, Auth.js (email, Google, Facebook and Apple sign-in), Zod validation, Sentry error monitoring and GitHub Actions CI.

Core Team Member 04/2026 – Present
AWS Community (University Chapter)
- Organized and ran AWS cloud fundamentals workshops for 16+ students.
- Planned and promoted campus-wide technical events with an agile team.

Founder & Tutor 2023 – 2024
ECPC Training Discord
- Founded a Discord community to train students for ECPC programming contests.
- Mentored 10+ students in C++ and problem solving alongside 2 other tutors, and entered 2 to 4 teams in ECPC together with mentees.

EDUCATION

Bachelor of Engineering in Computer Engineering 2023 – Expected 02/2028
Arab Academy for Science, Technology and Maritime Transport (AASTMT) Alexandria, Egypt
- Coursework: Operating Systems, Computer Networks, System Programming, Data Structures (C++), Microprocessors, Database Systems, Introduction to AI, Computer Graphics.

TECHNICAL SKILLS

Programming Languages
TypeScript, JavaScript, Python, C++, Java, C#, Assembly

Web
Next.js, React, Tailwind CSS, REST APIs, English and Arabic internationalization (RTL)

Data
PostgreSQL, MongoDB, Firebase, SQL Server, Power BI

Cloud & DevOps
AWS (EC2, S3 and Lambda basics), Docker Compose, GitHub Actions, Vercel, Git. Learning: Linux, AWS Cloud Practitioner (in preparation)

Hardware
ROS 2, Raspberry Pi, Arduino, 8086 microprocessor

Workflow
AI-assisted development (Claude Code, Antigravity)

SELECTED PROJECTS

EVE (Teleoperated Robot)
Team Lead · ROS 2, Raspberry Pi 4, Python, C++
- Led a team building a robot driven by a PlayStation controller, with ultrasonic sensors for distance sensing and custom ROS 2 messages for controller input.

Incarnatrun (Photo-to-3D-Avatar Web App) In progress
Next.js, React Three Fiber, PostgreSQL, Docker
- Turns one photo into a rigged humanoid avatar that exports to GLB and FBX, with an automated test suite.

SIC/XE Assembler
Python
Wrote a two-pass assembler for the SIC/XE architecture: pass 1 builds the symbol table and location counter, pass 2 generates object code.

Bean Plant Classification Model
Python, LightGBM, Google Colab
Trained a LightGBM classifier on a Kaggle dataset, reaching 93.15% accuracy.

CERTIFICATIONS & TRAINING

Cybersecurity Bootcamp, *HackerRank and AWS Student Builder Group AAST* — Aug – Sep 2026
Data Analysis and Visualization, *ICTHub Egypt, 60 hours, grade Excellent* — Jan – Feb 2026
AWS Hands-On Workshop, *AWS Cloud Club at AASTMT* — 2026
AWS Certified Cloud Practitioner — In preparation
